Vex robotics coding guide free printable pdf template

I'm not robot!

VEX evaluation is typically very efficient giving performance close to compiled C/C++ code. VEX is not an alternative to scripting, but rather a smaller, more efficient general purpose language for writing shaders and custom nodes. VEX is loosely based on the C language, but takes ideas from C++ as well as the RenderMan shading language. VEX is used in several places in Houdini: Rendering – mantra uses VEX for all shading computation. This includes light, surface, displacement and fog shaders. compositing – The VEX Generator and VEX Filter COPs allows you to write complex custom COPs in VEX. The expressions evaluate very close to C/C++ speeds and run 1000's of times faster than the Pixel Expression COP. Particles – The POP VOP allows you to do almost anything that POPs can do themselves. It is possible to write one single VEX function which performs the task of many POPs. Because the VEX code is localized to one single operator, the VEX code will typically run faster than a network of POPs. Modeling – The VEX SOP allows you to write a custom surface node that manipulates point attributes. This can move points around, adjust velocities, change colors. As well, you can group points or do many other useful tasks. VEX SOPs typically run 10 or more times faster than a point SOP. CHOPs – The VEX CHOP lets you to custom CHOPs. The CHOP functions can manipulate arbitrary numbers of input channels and process channel data in arbitrary ways. In some cases, the VEX code can run faster than compiled C++ code. Fur – Procedural fur behavior is implemented with VEX. VEXcode DownloadVEXos Firmware (IQ / V5) If you would like to see live video's of me creating a Vex Robot, explaining construction, coding in RobotC, and how to program the vehicle, please visit my Udemy course! Link Below. feel free to email me for personal tutoring where I can help you learn, trouble shoot, or create class assignments or projects for you! --> jamesshangle@gmail.comThis document describes, step by step, how to build a 4 wheePage 2These lesson slides includes the following: Coding termsReview of what degrees areMatching degrees with North, East, South, WestMoreover, it includes two activites to practice turning on the VEX playground. Student will be able to differentiate between the 'turn right', 'turn right for', and 'turn for rotation' blocks. To prove their new skills, they will be challenged to knock down all the towers in the "Castle Crasher" playground. For more information, you can look at the syllabus informationPage 3Use this interactive Toolbox to learn about some basic tools and hardware used with the VEX EDR kits. Learn about 3/32 & 5/64 screws, nuts, shafts, standoffs, spacers, pop rivets, shaft collars, flat bearings and hex drivers/keys. Slideshow is completely editable to include what you need. Included, an informational slide on how to use the slideshow in present mode.Page 4VEX IQ Parts Labels - Electronicsby This is a digital download of tags to label parts bins. My robotics classroom was getting out of control and students were having a hard time finding parts. I made these labels to organize my parts. I suggest printing out the labels in color. Cutting them up, laminating them and then taping them onto your bins based on how you organize your parts.Because it's a google document you can scale the parts photos to meet the size of your storage. All of my TPT files are no fuss - just things I use inThis is a bundle of short 5 min. videos that will teach your kids the basics of VEX VR coding.The Bundle can be used in introductory Coding or Robotics Classes in Middle School and High School.Save prep time with these ready to go videos that you can play to your classes right away and achieve your teaching objectives!Download it now! The license is one bundle per class.For other cool K12 CS resources, follow our Store!VEX IQ Parts Labels - Motionby This is a digital download of tags to label parts bins. My robotics classroom was getting out of control and students were having a hard time finding parts. I made these labels to organize my parts. I suggest printing out the labels in color. Cutting them up, laminating them and then taping them onto your bins based on how you organize your parts.Because it's a google document you can scale the parts photos to meet the size of your storage. All of my TPT files are no fuss - just things I use inVEX EDR Free Building Planning Templateby This planning worksheet is used for basic VEX EDR robots. I use this with my Robotics 1 class (this class is learning basic coding and then going into free build robots do compete in classroom contests). This is NOT used for the VEX Worlds Challenge each year. This worksheet incorporates isometric sketching as well as traditional multiview. It also has a section for students to document their schematics of the cortex.Simon Memory Game - VEX IQby Based on the popular SIMON Memory GameThe program will flash a random sequence which you need to repeatWith every level the sequence gets longerUse this game to teach the following concepts:Lists (Arrays)VariablesIf and If/Else statementsLoopsIncrementsOperatorsFunctions (My Blocks)Keep in mind that you will definitely spend much more time teaching this to 4th graders than 9th graders.VEX Sensorsby This is a powerpoint that I love to give to students when I introduce them into RobotC sensor setup using the motor and sensor setup screens. I fully created it to first introduce the differences between Analog, and Digital sensors. Then, give them actual examples within the program of our to wire these sensor up. I also have an example of what the schematics look like.VEX IQ Parts Labels - Otherby This is a digital download of tags to label parts bins. My robotics classroom was getting out of control and students were having a hard time finding parts. I made these labels to organize my parts. I suggest printing out the labels in color. Cutting them up, laminating them and then taping them onto your bins based on how you organize your parts.Because it's a google document you can scale the parts photos to meet the size of your storage. This particular file does not have a ton of labels. IVery Vexing Vectors (pg115)by Today was difficult. One of those Fridays that makes you question the pace of your teaching. Students completed the Very Vexing Vectors packet, with a lot of help from me. It included four different examples with questions to go along with them. It was clear from today that (a) vectors are a difficult concept for 8th graders, (b) we need more practice with vectors, and (c) I need a nap.Tags for VEX EDR Metalby Looking to get your VEX classroom organized? These tags can make all the difference. I've created a table of every VEX part - this is the metal parts download. These can be printed as is or edited to fit your containers. Just print (color works best) and tape to your containers. You will be amazed at how much cleaner your build room stays and how fewer questions you get from students about parts locations. This product is also available as part of the VEX EDU Parts Labels - Complete Bundle.Vex Sending Program to Robot Instructions Handout/Templateby I got tired of answering the same questions over and over.... so I've started creating "template" items for my VEX robotics classroom. These are 1 page helpers for students. This item is sold by itself and as part of my VEX Helper Template Bundle. I would recommend laminating this and then making an area (I use a wall hanging basket) to keep all of your templates in so students can answer their own questions. I will be adding to this section as I continue to make more Templates. EVERY studenTags for VEX EDR Misc and Gearsby Looking to get your VEX classroom organized? These tags can make all the difference. I've created a table of every VEX part - this is the Misc and Gears parts download. These can be printed as is or edited to fit your containers. Just print (color works best) and tape to your containers. You will be amazed at how much cleaner your build room stays and how fewer questions you get from students about parts locations. This product is also available as part of the VEX EDU Parts Labels - CompletPage 5Tags for VEX EDR Sensors and Motorsby Looking to get your VEX classroom organized? These tags can make all the difference. I've created a table of every VEX part - this is the Sensors and Motors parts download. These can be printed as is or edited to fit your containers. Just print (color works best) and tape to your containers. You will be amazed at how much cleaner your build room stays and how fewer questions you get from students about parts locations. This product is also available as part of the VEX EDU Parts Labels - ComTags for VEX EDR Wheelsby Looking to get your VEX classroom organized? These tags can make all the difference. I've created a table of every VEX part - this is the wheels download. These can be printed as is or edited to fit your containers. Just print (color works best) and tape to your containers. You will be amazed at how much cleaner your build room stays and how fewer questions you get from students about parts locations. This product is also available as part of the VEX EDU Parts Lables - Complete Bundle.VEX Hand Crankby Fits over metal axles. Cheap and easy replacement for the VEX crank handles you would buy from VEX. Easy to print 3D .stl file. I have used these in my class and they work great.You will get access to a Google Doc that has the link attached for you to download the file.VEX 3D printable 7.2 Battery Holderby Here you have a tested 3D printable VEX 7.2 Battery Holder. These have been used in my class for over a year. Printer settings will vary depending on your printer and type of filament.You will receive access to a Google Doc. On the doc will be a link that gives you access to download the file.Page 6Vex Robotics Course Syllabusby If you would like to see live video's of me creating a Vex Robot, explaining construction, coding in RobotC, and how to program the vehicle, please visit my Udemy course! Link Below. feel free to email me for personal tutoring where I can help you learn, trouble shoot, or create class assignments or projects for you! --> jamesshangle@gmail.comI used this document to describe the syllabus for the full yVEX IQ - Build a better Clawby This claw performs much better than the claw of the standard VEX IQ Clawbot. 1. Due to the 1:3 gear ratio, it is easier to control and has more torque. 2. The only place where torque is transferred by a shaft, is from the motor to the drive gear. All other torque transfers are done via gears and connectors – making it much sturdier. 3. It is a very compact design.VEX IQ Quick Build Engineering Journalby This journal is designed to expose and introduce students to the process of keeping an engineering journal. Students may use the journal show their design process and to plan, monitor, and reflect on the process of the build and of completing a course. Students are invited to sketch, collect data, and also reflect on the essential question of "What role does robotics play in our daily lives?" There is also a space for students to set goals on the professional skills and reflect on their collaborHexagon Math Challenge With Pattern Blocksby Don't be vexed by the "hex". The hexagon is often a "toughie" shape for students to learn. I think one of the reasons, is that you really don't see that shape too often in "real life". A fun way to give children more practice with hexagons, is by using pattern blocks. Have them count the pieces, stack them, pattern with them etc. One afternoon while I was designing some pattern block activities, I noticed that I could make a hexagon using other pattern blocks, which led me to creating this chTypes:Language Arts Printable: Using "who" and "whom" correctlyby Perhaps the most vexing of grammatical skills, the correct use of "who" and "whom" has been boiled down to an easy-to-use formula in this lesson, with examples followed by fifteen practice sentences where students choose the correct form, and finally ending with them writing four of their own sentences with "who" and "whom." Answers provided for the practice sentences. I hope you find this product useful. Visit my Common Core Language store, created to help busy teachers! All my best language sUnderstanding RobotCby Programming in RobotC for Vex Robots can have a learning curve not only for the students but the teachers as well. This guide can help you better understand how to set things up and help the kids get set up. Allow the kids to access this file to give them some extra guidance to help them through RobotC. The troubleshooting tab is very helpful to guide them through a few steps eliminating wasting time sitting and waiting for you the teacher. This has gone through many versions through the yeaTumbler Testbed CORTEX (old)by While teaching an Introduction to VEX Robotics to my 7th grade students I discovered that a testbed activity could teach them a TON about programming, but I didn't like the very basic one that was provided in the curriculum. And I felt that their programming presentation was WAY too involved. So I made my own. I used the basic idea of the VEX EDR Tumbler (older build instructions) and had students add all sorts of sensors and switches to control the robot. Then we walk through some basic prPrint and done! Designed for use with VEX and LEGO Robotics Teams and Classes. Check out the preview for more.Print and done, great activities or journal work. These resources are a great way to organize and prepare a team for success. Reflecting, using discussion starters, and collaborating helps create success. With these tools I like to have a class scrimmage and reflection. If you choose to go to showcases and competitions, this will prepare students and allow them to show off their core valRobot Bowlingby For this project, my students redesign their robot (VEX EDR, Tetrix, etc.) in order to bowl with a billiard cue ball. Students are expected to integrate a servo into their design in order to release the ball. The ball should roll smoothly onto the floor. The bowling lane consists of foam pool noodles and the pins are made of empty 1-L bottles. I give my students two days to get the robots modified before going bowling.NGSS:Page 7Help your students by using visuals to learn one of the more vexing aspects of learning Spanish: prepositionsThis video contains cartoon examples to illustrate the use of estar plus prepositions of place. Images and text are animated into various scenes.A variety of objects, people, places, and animals vividly show examples of these prepositions of place:a la derecha, a la izquierda, al lado de, cerca de, arriba de, encima de, debajo de, delante de, dentro de, detrás de, en, entre, lejos deThe vPage 8This is a 25 question digital Google Forms vocabulary assignment over Edgar Allan Poe's short story, "The Tell-Tale Heart." The assignment uses 10 vocabulary words from the story (acute, conceive, derision, stealthily, vehemently, audacity, crevice, hypocritical, stifled, and vex). Answer key is embedded into the document. No prep, no grading!Page 9This is a comprehensive review for all concepts in 8th grade physics. This review is aligned to NGSS science standards. A complete review for solar and lunar eclipse, Newton's Laws, Gravity, space science, balanced and unbalanced forces, CER - Claim, Evidence and Reasoning, and PLTW - Vex engineering concepts.Page 10What Robotic Engineers Do Lesson Planby This lesson would work well as a substitute lesson plan or as a lesson plan for the teacher that is looking for something different to do in the robotics classroom. It is a one day lesson plan that teaches students what a Robotics Engineer does while at work. Whether you teach LEGO Robotics or VEX Robotics or any other type of Robotics class, it is a fun lesson that uses very little materials. Included in this lesson plan are directions for the substitute teacher. You can give the students a choComponent Parts of a Robot Lesson Plan with Pixel Artby This lesson would work well as a substitute lesson plan or as a lesson plan for the teacher that is looking for something different to do in the robotics classroom. It is a one day lesson plan that teaches students about the major component parts of a Robot. Whether you teach LEGO Robotics or VEX Robotics or any other type of Robotics class, it is a fun lesson that uses very little materials. Included in this lesson plan are directions for the substitute teacher. You can give the students a choiSubjects:TELL-TALE HEART Edgar Allan Poe Vocabulary Crosswordby TELL-TALE HEART by Edgar Allan Poe includedVocabulary Crossword To differentiate a version with a word list is providedMatching assignment includedWord SearchWord List audacity concealment conceive cunningly derision dissemble dissimulation distinct dreadful envelop gesticulation gradual hastily hideous hypocritical mockery mournful profound refrain resolve sagacity stealthy stifled stimulate suavity sufficient supposition vehement vex waryNote: This product is meant to be used after students read the book.Students solve this puzzle by providing synonyms or antonyms for 25 vocabulary words from THE AUTOBIOGRAPHY OF MISS JANE PITTMAN.Examples of clues:* Gallery: Outdoor ___ (n.) ANSWER: balcony* Faculties: ___ abilities (n.) ANSWER: mental* Desegregate: To ___ the separation of races (n.) ANSWER: legally * Vex (v.) ANSWER: anger* Essence: The most important ___ of something (n.) ANSWER: aspectA fun way to learn vocabulary!NOTE: ThiHistory of Robots - Substitute Robotics Lesson Planby This lesson would work well as a substitute lesson plan or as a lesson plan for the teacher that is looking for something different to do in the robotics classroom. It is a one day lesson plan that provides students with a brief history of the words 'Robot' and 'Robotics.' Whether you teach LEGO Robotics or VEX Robotics or any other type of Robotics class, it is a fun lesson that uses very little materials. Included in this lesson plan are directions for the substitute teacher. You can giveBlack History Month Game in the Style of Jeopardy TMby The Lesson Lady presents Black History Month Jeopardy TM style game! Students will have a great time learning about African-American people, events, and terms using this fun game. Included is a 28 page colorful PowerPoint presentation allowing you to play this fun game with your students! The five categories covered by this game include Famous Places, Notable Women, Vexing Vocabulary, This Date in History, and Pleasing People. Please note that the preview is in PDF format and does not includePage 11Puzzle based on difficult or unusual words from Act 4 of Shakespeare's play. There are 47 clues to solve. Words in the puzzle are.. abstemious, amain, amends, apparel, austerely, bachelor, bounteous, canker, cleave, compensation, convulsion, corollary, dalliance, discord, dropsy, forsworn, frippery, gait, garners, goblin, hither, hogshead, industrious, infirmity, issue, jerkin, lea, mercy, minion, murkiest, nymph, opportune, oracle, paradise, potent, revels, saffron, shun, smite, summon, trialPage 12On the new SAT, AIR, and PARCC tests, students are asked to use inferencing skills to define words in context. Therefore, reading and defining words in context is more important than ever. This vocabulary unit, made of 20 advanced words from The Other Wes Moore, contains a student worksheet with each word used in the context of the book, an accompanying PPT that provides the context, definition, and pronunciation for each word, and a vocabulary quiz with answer key. The advanced word list, iPage 13This 68 page bundle has a crossword and word search for each of the 15 units of Sadlier-Oxford Vocabulary Level C. KEYs are provided. Also included are four larger word searches covering units; 1-4, 5-8, 9-12, and 13-15. This is a pdf file and ready for immediate duplication. The words covered by these 34 crosswords and word searches are: Unit 1: adage, decree, hovers, revert, bonanza, discordant, jostle, rubble, churlish, evolve, laggard, servile, citadel, excerpt, plaudits, vigil, collaboratePage 14Quizzes assess students' knowledge of each vocab word's definition, part of speech, and use in context. WORD LIST BELOW: Vocab #1-10 1. Supercilious: (adjective) showing arrogant superiority (synonyms: condescending, contemptuous, cocky, uppity, insolent – related to effrontery, patronizing, snobby) 2. Abstruse: (adjective) difficult to penetrate or understand (synonyms: enigmatic, esoteric, perplexing, complex, recondite – it’s Greek to me) 3. Waning: (verb) decreasing in strength or intensi
